INDEX.

Acadian Geology, review of Dawson's, 380
Algæ in Van Diemen's Land, 406
Amazon, Navigation of, 410
Amides of the Fatty Acids, 182
Anderson, Thomas, Decomposition of the Platinum Salts of the Organic Alkalies, 184
Anthracite, Fibrous, 142

Balfour, Professor, Flora of the Bass Rock, 198. On Megacarpæa polyandra, 202
Bass Rock, Flora of, 198
Beech Oil, 216
Blyth and Harkness, Professors, on the Cleavage of the Devonians of the South-west of Ireland, 245
British Weeds in Van Diemen's Land, 407

Calamite, remarks on, 205
Calcareous Zoophytes in the Boulder Clay of Caithness, 194
Calcium, Preparation of, 212
Caoutchouc in South America, 408
Ceylon, Zoology of, 179
Chambers, Robert, on Glacial Phenomena in Peebles and Selkirk Shires, 184
Cheiranthine, 294
Chromium, Preparation of, 212
Cinchonine, Destructive Distillation of, 187
Cinnabar, Manufacture of, at Idria, by M. Huyot, 406
Cleavage of the Devonians of the South-west of Ireland, 245
Cleland, John, on Placentation, 198
Coal-fields of Bengal, Age of, 210
Coal Naphtha, Basic Constituents of, 324
Cobbold, T. Spencer, M.D., Description of a Malformed Trout, 238. On a new Trematode Worm, 262
Cysticercus fasciolaris, production of, from the Eggs of the Tænia crassicollis, 208.

Daubeny, Dr, on the influence of the lower Vegetable Organisms in the production of Epidemic Diseases, 88. Appendix to Paper on the influence of the lower Vegetable Organisms in the production of Epidemic Diseases, 243
Davidson, Robert, on some new Compounds of Furfurine, 284
Davy, John, M.D., remarks on the Climate and Physical Characters of the Lake District of Westmoreland, 1. Miscellaneous Observations on some Tropical Plants, 298
Dawson, William, Acadian Geology, 380
D'Endegeest, Gevers, on the Drainage of the Lake of Haarlem, 309
De Lom, Bertrand, Gems and Fossils in the Haute Loire, 404
Desmideæ on West Lomond Hill, Fifeshire, 402
Deville, researches on Silicon and Titanium, 405
Diatomaceæ, new Fresh-water, 183, 200
Diatomaceæ, value of specific characters in, 200
Diatomaceæ, subfossil, in Dumfriesshire, 54
Diatomaceæ, Phytolitharia, and Sponge Spicules, in soils which support Vegetation, 399

XUM

Dickie, Professor, Effects of the past winter on trees near Belfast, 206
Dingle Promontory, Geology of, 225
Dillwyn and Motley, Natural History of Labuan and Borneo, review of, 395
Direction of the Wind, method of ascertaining, 33
Duvernois, George Louis, Biographical Sketch of, 223
Dyeing properties of Lichens, 57

Earthquake in Turkey, 221
Electric Fishes, Natural History of, by Andrew Murray, 35. Supplemental Observations on, 379
Electricity, review of Experimental Researches in, 176
Energetics, science of, 120
Epidemic Diseases, production of, 88. Appendix to paper on Epidemic Diseases, 243
Euclase, composition of, 217

Faraday, Experimental Researches on Electricity, review of, 176
Fasciola gigantica, 262
Fatty Acids, Amides of, 182
Feldspar containing Lithia, 410
Fleming, Dr, remarks on the Calamite and Sternbergia of the Carboniferous epoch, 205. On the Coal Plant termed Stigmaria, 189. On Rain-gauges, 195
Flowering of Spring Plants in the Edinburgh Botanic Garden, 199
Footprints, Fossil, in the Sandstone Rocks of Connecticut River, review of, 180
Fossils in the Limestone of Durness, Sutherlandshire, 197
Furfurine, new compounds of, 284

Galletly, John, on a new Glucoside existing in the petals of the Wallflower, 294
Gems and fossils in the Haut Loire, 404
Glacial Phenomena in Peebles and Selkirk Shires, 184
Glucoside in the Wallflower, 294
Goodsir, John, a brief review of the present state of Organic Electricity, 337
Gosse on the systematic position of the Rotifera, 208
Graphite, discovery of, on the Malvern Hills, 209
Gregory, Prof., on new fresh-water Diatomaceæ, 183, 200. On the presence of Diatomaceæ, &c., in soils which support vegetation, 399

Haarlem, Drainage of the Lake of, 309
Harkness, Robert, on a deposit containing subfossil Diatomaceæ in Dumfriesshire, 54. On the Geology of the Dingle Promontory, 225
Harkness and Blyth (Profs.), on the Cleavage of the Devonians of the South-west of Ireland, 245
Heddle, M. Foster, analysis of Morayshire slag, 196
Houzeau, researches on Nascent Oxygen, 211
Huyot, manufacture of Cinnabar at Idria, 406
Hydrology of the British Islands, 192

Jaguar, habits of American, 404
Jamieson, Prof. W., ornithological collections from the Eastern Cordillera of Ecuador, 114
Jardine, Sir William, contributions to Ornithology, 113. Pichincha, Ornithology of, 114
Johnston, George, Biographical Sketch of, 332

Kelaart, Zoology of Ceylon, review of, 179

Labuan and Borneo, Natural History of, review of, 395
Lake District of Westmoreland, Climate and Physical Characters of, 1.
Lawson, George, on the Musci and Desmideæ collected on West Lomond Hill, Fifeshire, 402
Lichens, Dyeing properties of, 57.

Lichens, List of Works on the Chemistry of the, 70
Lindsay, W. Lauder, on the Dyeing properties of Lichens, 57
Lithia in Feldspar, 410
Lithium, Preparation of, 213

M'Nab, James. Flowering of Spring Plants in the Edinburgh Botanic Garden, 199
Madeira, Insects of, 162
Malapterurus Beninensis, 49. Anatomy of, 195
Malformed Trout, Description of, 238
Malvern Range, Evidences of Downward Movements east of, by W. S. Symonds, 30
Manganese, Preparation of, 212
Megacarpæa polyandra, 202
Metals produced in Russia during 1852, 218
Metals, Statistics of production of, in 1854, 218
Metals, Oxidizable, prepared by Electrolysis, 212
Meteorology, 410
Meteorological Register at Arbroath, 219
Mineral Charcoal, Composition of, 141
Morlot (A.) on the Post-tertiary and Quaternary Formations of Switzerland, 14
Motley and Dillwyn's Natural History of Labuan and Borneo, review of, 395
Multiplied Observations, Accuracy obtainable by, 191
Murray, Andrew. Remarks on the Natural History of Electric Fishes, with the Description of a new species of Malapterurus from the Old Calabar River, 35. Supplemental Observations on Electric Fishes, 379
Musci on West Lomond Hill, Fifeshire, 402
Mustard, Artificial Preparation of Essential Oil of, 406

Napier, James. Observations on the Trap Dykes in the Sea-shore between the Bays of Brodick and Lamlash, in Arran, 81
Nascent Oxygen, 211
Natural History Review, 179
Nautilus umbilicatus, Organ of hearing in, 209
Navigation of the Amazon, 410
Nematoidea, Development of, 207

Old Stones, by W. S. Symonds, review of, 380
Organic Alkalies, Decomposition of the Platinum Salts of, 184
Organic Electricity, present state of, 337
Ornithology, Contributions to, 113

Peach, Charles W. Calcareous Zoophytes in Boulder Clay of Caithness, 194. Discovery of Fossils in the Limestone of Durness, 197
Peacock, George. Life and Works of Dr Thomas Young, 148
Phyllopod Crustacean, a new, 404
Phosphorite from the Siebengebirge, analysis of, 409
Piassaba fibre, 408
Pigments, two mineral substances employed as, 306
Placentation, on, 198
Plurality of Worlds, 267
Post-tertiary and Quaternary formations of Switzerland, by A. Morlot, 14

Rain-gauges, remarks on, 195
Rankine, W. J. Macquorn, Outlines of the Science of Energetics, 120
Rhind, William, metallic slag from Morayshire, 192. Hydrology of the British Islands, 192
Rotifera, systematic position of, 208
Rowney, Thomas H., on the chemical composition of Mineral Charcoal, 141. Amides of the Fatty Acids, 182. On two mineral substances employed as Pigments, 306

XUM

Sang, Edward, on the Accuracy obtainable by Multiplied Observations, 191
Sarsaparilla, Extract of a Letter on, 408
Schlagintweit on Vegetation above the Snow Line, 213
Selenium in Pseudo-malachite from Reinbreitbach, 410
Silicon, researches on, by M. Deville,
Slag, Metallic, from Morayshire, 192, 196
Smyth, Prof. C. Piazzi, on Solar Refraction, 181
Solar Refraction, Experiments to ascertain the amount of, 181
Sternbergia, remarks on the, 205
Stevenson, Thomas, Notice of an accurate and easily applied method of ascertaining the Direction of the Wind by observing the Reflected Image of the Clouds, 33
Stigmaria, remarks on, 189
Svanbergite, 217
Swan, William, on errors caused by the imperfect Inversion of the Magnet in Observations of Magnetic Declination, 190
Symonds, W. S., Evidences of Downward Movements east of the Malvern Range, 30. "Old Stones" reviewed, 380

Tetragonops ramphastinus, 404
Titanium, Metallic, by M. Deville, 405
Trap Dykes in Arran, 81
Trematode Worm, on a new, 262
Tropical Plants, observations on, 298

Vegetation above the Snow Line, 213
Viola calaminaria, 409

Warren, John C., Fossil Impressions in the Sandstone Rocks of Connecticut River, 180
Williams, C. Greville, Volatile Bases produced by the Destructive Distillation of Cinchonine, 187. On some of the Basic Constituents of Coal Naphtha, 324
Wilson, Dr George, on the Eye as a Camera Obscura, 181
Winter, Effects of, on Trees near Belfast, 206
Wollaston, T. Vernon, Insecta Maderensia, review of, 162

Young, Dr Thomas, Life and Works of, review of, 148

Zinin, Artificial Preparation of Oil of Mustard, by, 406

END OF VOLUME SECOND—NEW SERIES.

NEILL & Co., Printers, Edi rgh.
